

COURSES OF INSTRUCTION

This section of the catalog contains the course title and course description for each of the courses listed in the curriculum guides. At the end of each course description are printed three numbers, such as 3-2-4. The first number indicates the number of lecture hours for the course each week; the second number indicates the number of laboratory hours per week; and the third number indicates the semester hours of credit awarded for the successful completion of the course. Those courses that carry institutional credit and thus are not counted for graduation from SGC are appropriately marked. Students are herein notified that institutional credit courses do not transfer to other postsecondary institutions. Students are cautioned to check semester class schedules carefully to determine times and places of class meetings.

ACCOUNTING (ACCT)

ACCT 2101. Principles of Accounting I. A study of the underlying theory and application of financial accounting concepts. 3-0-3

ACCT 2102. Principles of Accounting II. A Study of the underlying theory and application of managerial accounting concepts. Prerequisite: ACCT 2101. 3-0-3

ANTHROPOLOGY (ANTH)

ANTH 1102. Introduction to Anthropology. An introduction to the origins, evolution, and present-day adaptations of the world's peoples. Emphasis is on the study of fossils, archaeological remains, and culturally diverse life ways. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

ANTH 1104. Introduction to Archaeology. An introduction to the methods, goals, and theoretical concepts of archaeology. Archeological interpretations of human societies using material remains are explored. Topics include the history of archaeology; developing a research design field methods, laboratory analyses, chronology, exaction, and analytical techniques. Prerequisites: SOCI 1101 or ANTH 1102 and passing or exempting MATH 0987 or MATH 0989. 3-0-3

ART (ARTS)

ARTS 2205. Understanding Art. Study of the underlying principles and understanding of the visual arts, including architecture, sculpture, and painting. Learning how to look at art in historical context. 3 0 3.

ASTRONOMY (ASTR)

ASTR 1010. Astronomy of the Solar System. Astronomy from early ideas of the cosmos to modern observational techniques. Topics include solar system planets, satellites, and minor bodies. The origin and evolution of the solar system. Prerequisite: MATH 1001 or 1111 and passing or exempting ENGL 0989. 3-0-3

ASTR 1010L. Laboratory for Astronomy of the Solar System. A laboratory course to augment and support ASTR 1010. Corequisite: ASTR 1010. Astronomy of the Solar System. 0-2-1

ASTR 1020. Stellar and Galactic Astronomy. The study of the sun and stars, the physical properties and evolution, interstellar matter, star clusters, our galaxy and other galaxies, and the origin and evolution of the Universe. Prerequisite: MATH 1001 or 1111 and passing or exempting ENGL 0989. 3-0-3

ASTR 1020L. Laboratory for Stellar and Galactic Astronomy. A laboratory course to augment and support ASTR 1020. Corequisite: ASTR 1020, Stellar and Galactic Astronomy. 0-2-1

BIOLOGY (BIOL)

BIOL 1010K. Introduction to Biology I. Areas studied include the chemistry of life, the cell, respiration, photosynthesis, mitosis, meiosis, and genetics. Laboratory exercises supplement the lecture material. This course is intended for non-science majors only. Prerequisite: Passing or exempting ENGL 0989. 3-2-4

BIOL 1020K. Introduction to Biology II. Areas covered are organisms in nature and include topics in the kingdoms of life, plant structure and function, systems of the body, evolution, and ecology. Laboratory exercises supplement the lecture material. This course is intended for non-science majors only. Prerequisite BIOL 1010K. 3-2-4

BIOL 2000. Introductory Botany. A course to acquaint students with plant structure and function. Emphasis will be placed upon the ecology and recognition of local flora. Corequisite: BIOL 2000L. Prerequisite: BIOL 2107K or permission of the instructor and passing or exempting ENGL 0989. 3-0-3

BIOL 2000L. Laboratory for Introductory Botany. A laboratory course to augment and support BIOL 2000. Prerequisite or Corequisites: BIOL 2000, Introductory Botany. Passing or exempting ENGL 0989. 0-2-1

BIOL 2107K. Principles of Biology I. The first course in a two-semester sequence addresses biological principles. This course covers topics from a molecular perspective. Areas studied include the chemistry of life, the cell, respiration, photosynthesis, mitosis, meiosis, genetics, protein synthesis, and recombinant DNA technology. Some knowledge of chemistry is desirable. Prerequisite: Passing or exempting ENGL 0989. 3-2-4

BIOL 2108K. Principles of Biology II. This course provides an overview of life at the organismal level. Emphasis will be placed on systematic relationships, diagnostic characters, functional systems and reproduction. Topics covered include biotic evolution, phylogeny, taxonomy, evolutionary history, and biodiversity of life. Prerequisite: BIOL 2107K. 3-2-4

BIOL 2210K. Anatomy and Physiology I. An introduction to biological processes and anatomic terminology followed by an integrated study of the structure and function of the human body, includes study of tissues, organs, and the following systems: integumentary, skeletal, muscular, and nervous. Prerequisite: BIOL 2107K or divisional or school approval and passing or exempting ENGL 0989. 3-2-4

BIOL 2211K. Anatomy and Physiology II. The course is a continuation of the study of the anatomy and physiology of the organ systems of humans. Animal dissection is included in laboratory work. Prerequisite: BIOL 2210K. Also, BIOL 2107K or divisional or school approval and passing or exempting ENGL 0989. 3-2-4

BIOL 2215K. Microbiology. The course is the study of microscopic forms of life. Emphasis is placed on infectious diseases highlighting the nature of organisms, the interrelationships of microorganisms and human hosts and the prevention and control of infectious diseases of humans. Laboratory work includes studies of microscopy, aseptic technique, culturing, staining methods, disinfection and disease. Prerequisite: BIOL 2107K or BIOL 2210K 3-2-4

BIOL 3100. Biochemistry. This survey course deals with the structure and function of biological molecules, including proteins, carbohydrates, lipids, the fundamentals of enzymology, and the molecular basis of metabolism. Prerequisite: BIOL 2107K, BIOL 2108K and CHEM 2401 and CHEM 2402. 3-0-3

BIOL 3130. Principles of Genetics. Course focuses on the investigation of principles of heredity at the molecular and cellular level; genetic mechanisms in viruses, bacteria, and eukaryotic cells with an emphasis on classical and modern experimentation; basis concepts for structure, expression, recombination and function of genetic material and principles. Prerequisite: BIOL 2107K and BIOL 2108K. 3-0-3

BIOL 3133. Evolution and Ecology. This course addresses the principles of evolution and ecology, and the manifestation of evolution, as mediated by ecology and genetics. Prerequisite: BIOL 2107K and BIOL 2108K. 3-0-3

BIOL 3400. Cell Biology. The course addresses the structure and function of cells, cell architecture and organization, cell cycle, membrane phenomena, energy transduction and cellular control mechanisms. Prerequisite: BIOL 2107K, BIOL 2108K and BIOL 3130 3-0-3

BIOL 3440K. Field Biology. This course examines field study of the basis natural history of plants and animals of the southeastern United States. Lectures and field trips emphasize the ability to locate, observe, collect, and identify organisms in the field, as well as, manage field data. Prerequisite: BIOL 2107K and BIOL 2108K, BIOL 3133. 3-2-4

BIOL 3500K. Ecology. This course covers the history of the field of ecology and the relationship between ecology and other fields of science. Topics will include applied ecological principles from individuals to ecosystems in connection with biogeochemical cycles, world biomes, and the economics and politics of pollution. The geographic history and ecology of the southeastern region of Georgia will serve as the local laboratory for this course. Prerequisite: BIOL 2107K, BIOL 2108K and BIOL 3133. 3-2-4

BIOL 3545K. Vertebrate Zoology. The course focus is the study of the classes of vertebrates in relation to taxonomy, life history, population, and evolution. Laboratory and field collections focus on vertebrates in Southeastern Georgia. Prerequisite: BIOL 2107K and BIOL 2108K and BIOL 3133. 3-2-4

BIOL 3630K. Freshwater Ecosystems. This course focuses on physical, chemical and biological processes occurring in lakes, streams and wetlands with special focus on the Okefenokee Swamp, the second largest freshwater ecosystem in Southeastern United States. Attention will be given to life cycles and adaptations of organisms and the impacts of human activity. Prerequisite: BIOL 2107K, BIOL 2108K and BIOL 3133. 3-2-4

BIOL 3910 Topics in Biology (variable). Variable credit topics will be offered and transcribed accordingly. Courses offered include areas of study outside the normal curriculum. Students may take one or two topics courses to meet degree requirements. Prerequisites: Biology major with junior standing; Passing or exempting ENGL 0989 2-0-2 or 3-0-3

BIOL 3950K. Ornithology. An examination of the classification, evolution, distribution, ecology, behavior, gross anatomy, migration, and life histories of birds. The laboratory emphasizes identification of avian species from Southeast Georgia based on external appearance and vocalization. Field trips are required. Prerequisite: BIOL 2107K and BIOL 2108K. 3-2-4

BIOL 4090. Conservation Biology. The course focuses on the history of the conservation movement; research on populations of animals and plants relevant to man's impact on the environment; pollution in terrestrial and aquatic ecosystems; the management of endangered species; wildlife biology; government regulation; and sustainable ecosystems. Prerequisite: BIOL 3500K. 3-0-3

BIOL 4500. Introduction to Biological Research. This course introduces the student to research methodologies and the student's assessment of topics in biology, and their ability to assimilate and disseminate information in an organized and understandable fashion in both written and oral forms. Prerequisite: Biology major with senior standing, MATH 2280 or permission of the instructor. 3-0-3

BIOL 4501. Senior Seminar. Exploration of the nature of science, ethics in science, critical analysis, hypothesis testing and statistical analysis, peer review, and research skills define this capstone course. Students engage in an independent research project or analyze professional research papers and present their analyses orally and in writing. Prerequisite: Biology major with senior standing, BIOL 4500. 3-0-3

BUSINESS/BUSINESS ADMINISTRATION (BUSA)

BUSA 1105. Introduction to Business. An integrative study of the functional areas of business (finance, operations, marketing, human resources, etc.) 3-0-3.

BUSA 2105. Communicating in the Business Environment. A course emphasizing both interpersonal and organizational communications; to include written and oral exercises appropriate to business practice. Prerequisite: ENGL 1101 or permission of instructor. 3-0-3

BUSA 2270. Legal Environment of Business. An introductory course providing an examination of the legal environments of society and business with emphasis on constitutional law, administrative law, anti-trust law, securities regulations, the law of employment, labor law, environmental law, consumer protection, and the powers and functions of the judiciary in modern society. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

BUSA 3000. Planning and Management. In today's world of work, it is critical that students understand the dynamics of the employment marketplace and the importance of self-direction. This course focuses on self-assessment, managing personal and professional change, enhancing work performance and maintaining a balance between work and family. Students will gain insight through self-assessment, networking, resume writing, interviewing, planning and directing their career. Students will develop a degree and career map that identifies learning outcomes essential to their academic and professional success. 3-0-3

BUSA 3100. Effective Communications Strategies. Effective communication skills are essential for personal and professional success. This course will explore the role of strategic communications within the professional context of contemporary organizations. Topics include strategic communications in business; interpersonal communications; team communications; electronic media and social media with a focus on best practices. Students will engage in assessing and creating strategic proposals, presentations and reports. 3-0-3

BUSA 3300. Negotiation. This course engages students in both the theory and practice of negotiation, comparing and contrasting different models and methods of negotiation, bargaining, and conflict resolution. Stages of negotiation, including pre-negotiation, negotiation itself, and finally post-settlement negotiation are emphasized, along with practical skills necessary to enable students to apply theory to cases. 3-0-3

CHEMISTRY (CHEM)

CHEM 1151K. Survey of Chemistry I. First course in a two-semester sequence covering elementary principles of general, organic and biochemistry designed for allied health professions majors. Topics to be covered include elements and compounds, chemical equations, nomenclature, and molecular geometry. Laboratory exercises supplement the lecture material. Prerequisite: Passing or exempting ENGL 0989; completion of or exemption from Foundations-level MATH courses. 3-2-4.

CHEM 1152K. Survey of Chemistry II. Second course in a two-semester sequence covering elementary principles of general, organic and biochemistry designed for allied health professions majors. Laboratory exercises supplement the lecture material. Prerequisite: CHEM 1151K with a grade of "C" or better. 3-2-4

CHEM 1211K. Principles of Chemistry I. First course in a two-semester sequence covering the fundamental principles and applications of chemistry designed for science majors. Topics to be covered include composition of matter, stoichiometry, periodic relations, and nomenclature. Laboratory exercises supplement the lecture material. Prerequisite or Corequisite: MATH 1111 or MATH 1113. Prerequisite: Passing or exempting ENGL 0989. 3-2-4

CHEM 1212K. Principles of Chemistry II. Second course in a two-semester sequence covering the fundamental principles and applications of chemistry designed for science majors. Laboratory exercises supplement the lecture material. Prerequisite: CHEM 1211K with a grade of "C" or better. 3-2-4

CHEM 2401K. Organic Chemistry I. The first course in a two-semester sequence covering the chemistry of carbon compounds. Emphasis is placed on synthesis, reactions and reaction mechanisms, and functional groups. Prerequisite: CHEM 1212K with a grade of "C" or better. 3- 2-4

CHEM 2402K. Organic Chemistry II. The second course in a two-semester sequence covering the chemistry of carbon compounds. Emphasis is placed on compounds of biological interest including heterocyclic compounds, carbohydrates, amino acids and proteins, and nuclear acids. Prerequisite: CHEM 2401K. 3-2-4

COMMUNICATIONS (COMM)

COMM 1100. Human Communication. An introductory course emphasizing a broad approach to oral communication skills, including intrapersonal, interpersonal, small group, public speaking, and mass communication. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

COMM 1110. Public Speaking. An introductory course in fundamental principles and practices of oral communication with special emphasis on the organization, content, and delivery of public speeches. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

COMM 2000. Introduction to Mass Communications. A course emphasizing the study of the processes, elements, uses and the impacts of mass communication, including the history, development, operation, and cultural effects of various forms of media (e.g., books, newspapers, magazines, motion pictures, radio, television, sound recordings, and computer media) on society. Prerequisites: Passing or exempting ENGL 0989. 3-0-3

COMM 2010. Interpersonal Communication. An introduction to human communication. This course will specifically address interactions between genders and among cultures in today's diverse environment, focusing on one-to-one and small-group communication practice. There is an emphasis on critical thinking, and building clarity in listening, speaking, reading and writing in areas of human social interactions. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

COMPUTER INFORMATION SYSTEMS (CISY)

CISY 1100. Fundamentals of Computer Information Systems. An introduction to the principles of hardware and software; the current Windows environment, e-mail, the Internet, file management and word processing. No previous computer knowledge or experience is required. 1-0-1

CISY 1101. Computer Applications. A continuation of CISY 1100 including additional word processing features, an introduction to electronic spreadsheets, and a deeper analysis of the information processing cycle. Prerequisite: CISY 1100 or permission of instructor. 1-0-1

CISY 1105. Information Systems Technology. This course uses an introductory, hands-on approach to provide students with basic awareness, understanding, and skills in the educational and business utilization of microcomputers. Topics include introductions to word processing, databases, graphics, spreadsheets, communications, presentation software, and the Internet and electronic mail. A student with credit for CISY 1105 will not receive credit toward graduation for either CISY 1100 or 1101. 3-0-3.

CISY 2210. Advanced Computer Applications. An intensive study of electronic spreadsheets, database applications, and their integration with word processors. Prerequisite: CISY 1100 and CISY 1101 or CISY 1105 or permission of instructor. 3-0-3

COMPUTER SCIENCE (CSCI)

CSCI 1301. Computer Science I. This course includes an overview of computers and programming; problem-solving and algorithm development; simple data types; arithmetic and logical operators; selection structures; repetition structures; text files; arrays (one-and two-dimensional); procedural abstraction and software design; modular programming (including subprogram or the equivalent). Pre-requisite: Passing ENGL 1101 and Passing MATH 1113 with a grade of C or higher. 4-0-4

CSCI 1302. Computer Science II. This course includes an overview of abstract data types (ADTs); arrays (multi-dimensional) and records; sets and strings; binary files; searching and sorting; introductory algorithm analysis (including Big-O); recursion; pointers and linked lists; software engineering concepts; dynamic data structures (stacks, queues, trees). Prerequisite: CSCI 1301. 4-0-4

CRIMINAL JUSTICE (CRJU)

CRJU 1101. Introduction to Criminal Justice. An orientation course designed to acquaint the student with the structural, functional, historical, and philosophical aspects of the criminal justice system that includes law enforcement, corrections, juvenile justice, and the courts. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

CRJU 2100. Survey of Law Enforcement. An overview of law enforcement in a free society and the relationship of police to the criminal justice system as a whole. History, organization, administration, operations, and selected issues such as community-oriented policing are examined. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

CRJU 2200. Introduction to Corrections. An introduction to the correctional system, examining the historical, philosophical, and theoretical aspects of the correctional system including incarceration, parole, and juvenile systems, as well as social interventions. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

CRJU 2300. Judicial Process. A study of the jurisdiction, policies, and procedures of courts in the administration of criminal justice. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

DIVERSITY (DVRS)

DVRS 1101. Topics in Diversity. A broad overview of the elements of cultural diversity. The course defines the concepts of “culture” and “diversity” and reinforces awareness as a strategy for success in a global society. Prerequisite: Passing or exempting ENGL 0989. 1-0-1

ECONOMICS (ECON)

ECON 2105. Principles of Macroeconomics. This course is intended to introduce students to the concepts that will enable them understand and analyze economic aggregates and evaluate economic policies. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

ECON 2106. Principles of Microeconomics. This principle of economics course is intended to introduce students to concepts that will enable them to understand and analyze structure and performance of the market economy. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

EDUCATION (EDUC)

EDUC 2110. Investigating Critical and Contemporary Issues in Education. This course engages students in observations, interactions, and analyses of critical and contemporary educational issues. Students will investigate issues influencing the social and political contexts of educational settings in Georgia and the United States. Students will actively examine the teaching profession from multiple vantage points both within and outside the school. Against this backdrop, students will reflect on and interpret the meaning of education and schooling in a diverse culture and examine the moral and ethical responsibilities of teaching in a democracy. EDUC 2110 includes ten hours of field experience. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

EDUC 2120. Exploring Socio-Cultural Perspectives on Diversity in Educational Contexts. Given the rapidly changing demographics in our state and country this course is designed to equip future teachers with the fundamental knowledge of understanding culture and teaching children from diverse backgrounds. Specifically, this course is designed to examine 1) the nature and function of culture; 2) the development of individual and group cultural identity; 3) definitions and implications of diversity, and 4) the influences of culture on learning, development, and pedagogy. EDUC 2120 includes ten hours of field experience. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

EDUC 2130. Exploring Learning and Teaching. Explore key aspects of learning and teaching through examining your own learning processes and those of others, with the goal of applying your knowledge to enhance the learning of all students in a variety of educational setting and contexts. EDUC 2130 includes ten hours of field experience. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

ENGLISH (ENGL)

ENGL 0989. Foundations for English Composition. This is the first course in a year-long pathway leading to ENGL 0999 and ENGL 1101 in the second semester. \$3.00 lab fee. 3-0-3 (Institutional Credit.)

ENGL 0999. Support for English Composition. This course is intended to provide corequisite support for students requiring remediation in English or reading while they are enrolled in ENGL 1101 – English Composition I. 0-2-1 (Institutional Credit.)

ENGL 1101. Composition I. A composition course focusing on skills required for effective writing in a variety of contexts, with emphasis on exposition, analysis, and argumentation, and also including introductory use of a variety of research skills. Prerequisites: Passing or exempting ENGL 0989. Learning support students who have taken and successfully completed ENGL 0989 or who have tested into ENGL 0999 must take ENGL 0999 as a corequisite to ENGL 1101. Minimum grade of “C” is required for graduation. 3-0-3

ENGL 1102. Composition II. A composition course that develops writing skills beyond the levels of proficiency required by ENGL 1101, that emphasizes interpretation and evaluation of works of various literary genres, and that incorporates a variety of more advanced research methods. Prerequisite: ENGL 1101 with a minimum grade of “C”. Minimum grade of “C” in ENGL 1102 is required for graduation. 3-0-3

ENGL 1111-1116. Creative Writing. This course sequence offers practical writing experience in major literary genres, with special emphasis on short fiction and poetry. It includes in-class analysis and criticism of the works produced. 1-0-1 (Institutional credit)

ENGL 2111. World Literature I. A survey of important works of world literature from ancient times through the mid-seventeenth century. Prerequisite: ENGL 1102 with a grade of “C” or better. 3-0-3

ENGL 2112. World Literature II. A survey of important works of world literature from the mid-seventeenth century to the present. Prerequisite: ENGL 1102 with a grade of “C” or better. 3-0-3

ENGL 2121. British Literature I. A survey of important works of British literature from the Old English period through the neoclassical age. Prerequisite: ENGL 1102 with a grade of “C” or better. 3-0-3

ENGL 2122. British Literature II. A survey of important works of British literature from the Romantic era to the present. Prerequisite: ENGL 1102 with a grade of “C” or better. 3-0-3

ENGL 2131. American Literature I. A survey of American literature from the pre-colonial age to the mid-nineteenth century. Prerequisite: ENGL 1102 with a grade of “C” or better. 3-0-3

ENGL 2132. American Literature II. A survey of American literature from the mid-nineteenth century to present. Prerequisite: ENGL 1102 with a grade of “C” or better. 3-0-3

FINANCIAL MANAGEMENT (FINA)

FINA 3103. Financial Management. This course provides an overview of business financial management. Emphasis is on financial statement analysis, time value of money, management of cash flow, risk and return, and sources of financing. The course is intended to develop a basic understanding of financial concepts and techniques, and an ability to apply them in arriving at management decisions within the context of specific business situations. It covers the development and use of the basic tools and operational/ quality measures for financial administration, financial analysis, planning and control, investment decisions, and management of sources of funds. Prerequisites: ACCT 2101 and ACCT 2102. 3-0-3

FRENCH (FREN)

FREN 1001. Elementary French I. Grammar, reading, writing, simple listening and speaking skills. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

FREN 1002. Elementary French II. Continuation of French 1001. Prerequisite: FREN 1001 or equivalent. 3-0-3

FREN 2001. Intermediate French I. A more advanced course which refines skills in grammar, reading, writing, and speaking. Prerequisite: FREN 1002 or equivalent. 3-0-3

FREN 2002. Intermediate French II. Application and refinement of basic skills with emphasis on reading, writing, and speaking. Prerequisite: FREN 2001 or equivalent. 3-0-3

HEALTH (HLTH)

HLTH 1103. Contemporary Health Issues. This course is designed to introduce students to a wide range of health issues while stressing the concept of individual wellness. 2-0-2.

HEALTH & HUMAN PERFORMANCE(HLHP)

HLHP 2010. Foundations of Health and Physical Education. Through this course the student explores the history, principles, and philosophical bases of health and physical education. Career opportunities in health and physical education are examined and important leaders and literature reviewed. This course does not satisfy the core curriculum Physical Education requirement. 3-0-3.

HLHP 2015. Fundamentals of Nutrition. This elective course is designed to examine diet and the role of nutrients in body function throughout the life cycle in order to promote changes to increase life expectancy, decrease cardiovascular disease, improve dietary patterns, and contribute to healthy quality of life. 2-0-2

HLHP 2020. Introduction to Athletic Training. The purpose of this required course is to introduce the student to the field of athletic training. Athletic trainers develop and implement strategies and programs to prevent the incidence and/or severity of injuries and illnesses and optimize their clients' overall health and quality of life. These strategies and programs also incorporate the importance of nutrition and physical activity in maintaining a healthy lifestyle and in preventing chronic disease. 3-0-3

HLHP 2030. Athletic Injuries. This elective course is designed to provide information on basic injury prevention, identification, and rehabilitation, as well as to examine overall healthcare for recreational and competitive athletes. 2-0-2

HLHP 2040, Strength and Conditioning. This elective course is designed to teach the theoretical basis and principles involved in strength and conditioning programs. Topics include testing, evaluation, effective exercise techniques, and programming to improve physical performance and health. 2-0-2

HISTORY (HIST)

HIST 1111. World History I. A survey of World History to early modern times. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

HIST 1112. World History II. A survey of World History from early modern times to the present. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

HIST 1121. Western Civilization I. A survey of Western Civilization to early modern times. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

HIST 1122. Western Civilization II. A survey of Western Civilization from early modern times to present. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

HIST 2100. Introduction to the European Union. This course introduces the student to the historical origins and development of the European Union, the EU's governing institutions, the EU's policymaking processes, current EU policies and issues, and EU-US relations. The course also constitutes the core offering of the European Union Studies Certificate program. Prerequisite: Passing or exempting ENGL 0989. 3-0-3 (Cross-listed as POLS 2100.)

HIST 2111. American Civilization I. A survey of U. S. History to the post-Civil War period, with special emphasis on Georgia history. (Satisfies the Georgia Legislative in United States and Georgia history.) Prerequisite: Passing or exempting ENGL 0989. 3-0-3

HIST 2112. American Civilization II. A survey U. S. History from the post-Civil War period to the present, with special emphasis on the State of Georgia. (Satisfies the Georgia Legislative in United States and Georgia history.) Prerequisite: Passing or exempting ENGL 0989. 3-0-3

HIST 2200. Studies of the European Union. The purpose of the course is to provide an in-depth analysis on a selected aspect of the study of European Union (EU). The course is intended as an Area E. elective for students interested in taking a course in the Online or Study Abroad catalogs of the University System's European Union Center for which the only prerequisite is POLS 1101. Prerequisite: ENGL 0989, prior approval of the instructor and successful completion of POLS 1101. 3-0-3 (Cross-listed as POLS2200)

HIST 2220. African American History. A survey of the history of African Americans in the United States, emphasizing their unique heritage within, historical evolution in, and contributions to American society. The course analyzes the institutions, personalities, and trends that shaped the social, economic, political, and cultural developments of the United States. Prerequisite: ENGL 0989. 3-0-3

HUMANITIES (HUMN)

HUMN 2111. A Survey of the Humanities in the West I. A literary comparative study of European philosophy, art, history, politics, and the sciences from the Classical Period through the Renaissance; includes a focus on the writings of the great artists, philosophers, and scientists who created and developed Western liberal learning. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

HUMN 2112. A Survey of the Humanities in the West II. A literary comparative study of European and American philosophy, art, history, politics, and the sciences from the end of the Renaissance to the 21st Century; includes a focus on the writings of the great artists, philosophers, and scientists who created and developed Western liberal learning. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

INTEGRATED SCIENCE (ISCI)

ISCI 2001. Life/Earth Science. A lab science activity-based and inquiry-based Area F content course for early education majors. This course emphasizes the characteristics of life, biodiversity/heredity, energy flow, the interdependence of life, the cell, earth systems, and the lithosphere and hydrosphere and biosphere. These topics are in direct correlation with the Georgia Performance Standards (GPS) K-5. Prerequisite: Passing or exempting ENGL 0989. 2- 2-3

ISCI 2002. Physical Science. A lab science activity-based and inquiry-based Area F content course for early education majors. This course emphasizes the concepts of matter, energy, force, and fields. These topics are in direct correlation with the Georgia Performance Standards (GPS) K-5. Prerequisite: Passing or exempting ENGL 0989. 2-2-3

JOURNALISM (JRNL)

JRNL 1100-1105. Practical Journalism. Primarily lab courses designed for students working on student publications. Some theory plus practical experience in writing, editing, and graphics. 0-2- 1 for each course. (Institutional Credit)

MANAGEMENT (MGMT)

MGMT 3101. Principles of Management. This survey course emphasizes the skills and knowledge needed to successfully manage an organization. Students will study the basic managerial functions of planning, organizing, leading and controlling resources to accomplish organizational goals. 3-0-3.

MGMT 3102. Management and Supervision. Students will develop and demonstrate skills necessary for supervisory roles in business, including identifying and communicating performance objectives and standards, leading, motivating, and coaching teams and individuals, and developing strategies to improve on-the-job performance. Students will learn about effective delegation, performance management, and writing performance reviews and will be able to discuss the specifics of the supervisor's role and responsibilities, and strategies for improving their overall effectiveness as a leader. Prerequisite: MGMT 3101. 3-0-3.

MGMT 3104. Quality Management. This course offers an introduction to the management of quality in organizations. Areas of study include statistical quality control. The design of quality management systems, implementation, measurement and management issues in quality program. Prerequisite: MGMT 3102. 3-0-3.

MGMT 3150. Business Ethics. This seminar course will enable students to engage in critical thinking and analysis as they examine difficult moral and ethical problems that many arise in a variety of professional settings. Readings and discussion will focus on issues of personal decision-making and public policy in the context of their social, political, economic and legal parameters. Students will be engaged in discussions, case studies, and the development of a persuasive argument based on research from multiple sources. 3-0-3

MGMT 3401. Diversity in Business. This course presents the basic concepts, principles and techniques associated with leading cultural diversity in the global marketplace. Emphasis will be on the students developing and understanding of the interplay between leadership, cultural diversity and the global business model. 3-0-3.

MGMT 4100. Applied Project. The Applied Project is intended to allow students interested in linking their studies with work by following a structured project pathway. Students develop a proposal, action plan and complete a project drawing upon appropriate research resources. Prerequisite: Completion of year one of program curriculum. 3-0-3

MGMT 4101. Project Management. This course develops a foundation of concepts and solutions that supports the planning, scheduling, controlling, resource allocation, and performance measurement activities required for successful completion of a project. The course includes major topics of strategy, priorities, organization, project tools and leadership. Primary class emphasis is on the project management process and the tools available to help ensure success. Prerequisite: MGMT 3104. 3-0-3.

MGMT 4102. Entrepreneurship. This course provides an overview of the multiple elements associated with starting and operating a small business. The course covers a wide range of fundamentals including: identifying needs of the marketplace, researching and assessing market opportunities, identifying and analyzing risk, creating a value proposition, designing and introductory marketing platform, obtaining financing, cash flow strategies, operating a small business, growing a small business and relevant best practices. Prerequisites: MGMT 3101. 3-0-3.

MGMT 4200. Sustainable Enterprise Planning. This course introduces students to the ecological and economic benefits of sustainability and green practices. Students will learn how product, process and service decisions affect sustainable enterprise concepts. The course examines social and environmental challenges, marketing, supply chain decisions, recycling, reusing, reconditioning and other product and service decisions in order to realize a competitive advantage. Prerequisites: MGMT 3101 and MGMT 3104. 3-0-3.

MGMT 4600. Senior Seminar. The Senior Seminar allows students to engage in an independent research project or analyze professionally related research papers. The Senior Seminar serves as a capstone course validating student achievement of higher order learning outcomes. To be completed in final semester of program. 3-0-3

MARKETING (MKTG)

MKTG 3101. Principles of Marketing. This course provides the fundamental principles in the marketing of goods, services, and ideas. Course includes planning, pricing, promotions, and distribution. The role of marketing management is to help companies better understand customer preferences, link that knowledge to designing appropriate products and services for selected customers, and determine appropriate methods to communicate, to deliver, and to capture value. Successful firms are those that pursue objectives, deploy resources, and invest in the future of an organization, to consistently satisfy the needs of customers better than their competitors. The basic principles of marketing apply to both for-profit and not-for-profit organizations. 3-0-3.

MKTG 3102. Consumer Behavior. This course explores the application of psychological and sociological theories and research findings to the decision-making process and their implications for consumer behavior decisions. Students will explore research findings and studies on purchasing patterns. 3-0-3.

MKTG 3103. Marketing Research. This course introduces students to research methods and designs used in market research and the application of research findings. Students will engage in hands-on application of research methodology including planning, implementation and presentation of results. Prerequisite: MKTG3101. 3-0-3.

MKTG 3104. Marketing Management. This course helps develop the marketing knowledge and skills necessary for the successful manager to address the intermediate marketing issues surrounding a complex demand management problem all organizations face. Students will gain an understanding of marketing concepts, including the development of a marketing strategy. The course will focus on consumer and business-to-business management. Prerequisite: MKTG 3101. 3-0-3.

MKTG 3105. Marketing Information Systems. This course focuses on the concepts, tools, trends and organization of information systems. Topics include: e-commerce, social media, network technologies, enterprise resource management and digital technologies as well as emerging technologies influencing marketing and management. Prerequisite: MKTG 3101. 3-0-3.

MKTG 4102. Integrated Marketing Communications. Processing relevant, effective marketing communications is critical to building brands, creating and maintaining relationships, managing expectations and delivering value. This course offers a broad introduction to integrated marketing communications (IMC). Prerequisite: MKTG 3101. 3-0-3.

MATHEMATICS (MATH)

MATH 0987. Foundations for Quantitative Reasoning. This is the first course in a year-long pathway leading to MATH 0997 and MATH 1001 in the second semester. This course integrates numeracy, proportional reasoning, algebraic reasoning, and understanding of functions. Students will develop conceptual and procedural tools that support the use of key mathematical concepts in a variety of contexts. 4-0-4 (Institutional Credit)

MATH 0989. Foundations for College Algebra. This is the first course in a year-long pathway leading to MATH 0999 and MATH 1111 in the second semester. A review of basic arithmetic concepts with special attention to fractions and decimals. Special emphasis on exploring the language of algebra, linear equations, polynomial operations, factorization, rational expressions and word problems. 4-0-4 (Institutional Credit)

MATH 0988. Foundations for Math Modeling. This is the first course in a year-long pathway leading to MATH 0998 and MATH 1101 in the second semester. Topics include properties of real numbers, linear equations in a single variable, operations with polynomials, quadratic equations, graphing linear and quadratic equations in two variables, and factoring. 4-0-4 (Institutional Credit).

MATH 0998. Support for Mathematical Modeling. This course is intended to provide corequisite support for students requiring remediation in mathematics while they are enrolled in MATH 1101 – Introduction to Mathematical Modeling. 0-2-1 (Institutional Credit)

MATH 1001. Quantitative Reasoning. This course emphasizes quantitative reasoning skills needed for informed citizens to understand the world around them. Topics include logic, basic probability, data analysis, and modeling from data. Prerequisite: Passing or exempting MATH 0987. A grade of “C” or better is required for graduation. 3-0-3

MATH 1101. Introduction to Mathematical Modeling. This course is an introduction to mathematical modeling using graphical, numerical, symbolic, and verbal techniques to describe and explore real-world data and phenomena. Emphasis is on the use of elementary functions to investigate and analyze applied problems and questions, supported by the use of appropriate technology, and on effective communication of quantitative concepts and results. Prerequisite: Passing or exempting MATH 0988. A grade of “C” or better is required for graduation. 3-0-3

MATH 1113. Pre-calculus. This course is an intensive study of the basic functions needed for the study of calculus. Topics include algebraic, functional and graphical techniques for solving problems with algebraic, exponential, logarithmic, and trigonometric functions and their inverses. Prerequisite: MATH 1111 or departmental permission. A grade of “C” or better is required for graduation if course is used in Area A or Area F. 4-0-4

MATH 2008. Foundations of Numbers and Operations. This course is an Area F introductory mathematics course for early childhood education majors only. This course will emphasize the understanding and use of the major concepts of number and operations. As a general theme, strategies of problem solving will be used and discussed in the context of various topics. Prerequisite: Math 1001, Math 1111, or Math 1113. 3-0-3

MATH 2253. Calculus I. A course integrating basic ideas from analytic geometry with the introductory concepts of differential and integral calculus. Topics include limits, continuity, slope, tangent, rate of change, optimization, derivatives, and integrals. The Fundamental Theorem of Calculus is studied in detail. Applications are drawn from physics, engineering, business, and economics. A thorough knowledge of algebraic and trigonometric identities is necessary for success in this course. Prerequisite: A grade of “C” or better in MATH 1113. 4-0-4.

MATH 2254. Calculus II. A continuation of Calculus I. Transcendental, logarithmic, exponential, and trigonometric functions are defined and their differential and integral properties are studied in detail. Techniques of integration, such as trigonometric substitution, integration by parts, and partial fractions are developed. Other topics studied include the theory of plane analytic geometry, the relationship between Cartesian and polar coordinates, conic sections, indeterminate forms, L’Hopital’s rule, improper integrals, Taylor’s formula, the theory of sequences and infinite series, tests for convergence, and the power series representation of elementary functions. Prerequisites: A grade of “C” or better in MATH 2253. 4-0-4

MATH 2255. Calculus III. A continuation of Calculus II. A study of vectors in the plane as well as vectors in three-space; lines, planes, and surfaces in space; real-valued functions of several variables, partial derivatives, multiple integrals, vector analysis, and applications. Prerequisite: MATH 2254. 4-0-4

MATH 2280. Introduction to Statistics. An introductory course in statistical decision-making methods including sampling, measures of central tendency, frequency distributions, and hypothesis testing. Prerequisite: Completion of, or exemption from, Foundations-level MATH courses. 3-0-3

MUSIC (MUSI)

MUSI 1000, 1001, 1002, 1003, 1004, 1005. College Chorus. This two-hour institutional credit lab course is for the purpose of organizing, instructing, and rehearsing a choral ensemble. The chorus will perform at College and community events, as well as by invitation outside of the local community. No prerequisite. 0-4-2

MUSI 1010, 1011, 1012, 1013. This two-hour institutional credit lab course is for the purpose of organizing, instructing, and rehearsing a jazz band ensemble emphasizing a popular, jazz, blues and show tune repertoire. The jazz band will perform at college and community events, as well as by invitation outside of the local community. No prerequisite. 0-4-2 (Institutional credit)

MUSI 1100. Music Appreciation. Designed to develop appreciation of music through listening and study. Topics include musical instruments, terms and symbols, forms, and characteristics/composers of the Medieval, Renaissance, Baroque, Classical, Romantic, and Modern periods. 3-0-3

NURSING (NURS)

NURS 1000. Medical Terminology. A one semester hour online course designed to prepare students to identify basic word elements, define medical words, locate and describe body systems, describe pathological conditions, and describe diagnostic and therapeutic procedures. 1-0-1

NURS 1100. Introduction to Nursing. A four- semester-hour course placed in the first semester of the nursing sequence. This course will be taught during Fall Semester Term A. There are eight hours of class weekly. It is an introductory course designed to provide the student with fundamental knowledge upon which sequential study will be developed. Calculations of mathematical measurements and conversions essential to the administration of medications are stressed throughout this course. The concepts of adaptation, developmental stages, basic needs theory, critical thinking, health promotion, maintenance and restoration, and associate degree role functions are introduced as the framework of the nursing curriculum. Prerequisites: Completion of PSI background and drug screening. Current health insurance and current physical examination, PPD and immunizations. Current CPR certification or concurrent enrollment in a CPR class approved by the American Heart Association or American Red Cross including infant, child and adult. Completion of all learning support requirements. Concurrent enrollment in or completion of BIOL 2210K and PSYC 1101 with grades of "C" or better. 4-0-4

NURS 1101. Fundamentals of Nursing. A four- semester-hour course taught during Fall Semester Term B of the nursing sequence. There are four hours of class and eight hours of lab experiences weekly. This course is designed to provide the student with basic skills and to facilitate the acquisition of fundamental knowledge upon which sequential study will be developed. Practical application and hands-on learning experiences for basic nursing skills, patient assessments, vital signs and medication administration are provided. Basic therapeutic skills are learned, practiced and demonstrated safely in the campus laboratory as simulated experiences. Prerequisites: Completion PSI background check and drug screening. Current health insurance and current physical examination, PPD and immunizations. Current CPR certification or concurrent enrollment in a CPR class approved

by the American Heart Association or American Red Cross including infant, child and adult. Completion of all learning support requirements and concurrent enrollment in or completion of BIOL 2210K and PSYC 1101 with grades of “C” or better. Completion of NURS 1100 Term A with a grade of “C” or better. 2-4-4

NURS 1102. Care of Adults I. A five-semester-hour course placed in the second semester of the nursing sequence. There are three hours of class and six hours of lab weekly. It is designed as a continuation of Nursing 1101 and facilitates use of the nursing process when caring for clients who are experiencing interferences with the basic physiologic needs of oxygenation, mobility, and nutrition and the basic safety, love and belonging, and self-esteem needs. Technical skills are refined, and new skills are learned in simulated and actual clinical experiences. Emphasis is placed on specific regulatory mechanisms, and physical and emotional maladaptive responses to stressors occurring with clients during the developmental stage of middle adulthood. Prerequisites: Completion of PSI background check and drug screening. Current health insurance and current physical examination, PPD and immunizations. Current CPR certification or concurrent enrollment in a CPR class approved by the American Heart Association or American Red Cross including infant, child and adult. Completion of NURS 1100 and 1101, PSYC 1101, BIOL 2210K, and concurrent enrollment in or completion of BIOL 2211K with grades of “C” or better. 3-6-5

NURS 1103. Mental Health Nursing. A five- semester- hour course placed in the second semester of the nursing sequence. It includes three hours of class and six hours of clinical each week. The course is intended to provide basic knowledge and skills necessary to meet the needs of mental health clients. Emphasis is placed on the students’ use of oral communication with clients in both one-to-one and group settings. Dynamics of adaptive and maladaptive behaviors are considered. Knowledge of Maslow’s Hierarchy of Needs and Erikson’s Stages of Development are utilized to assess client needs. Students are expected to use critical thinking in essential nursing roles to provide care for clients in community health settings. Clinical experiences will be with mental health clients in acute, residential and community agencies including day treatment centers and substance abuse centers. Prerequisites: Completion of PSI background check and drug screening. Current health insurance and current physical examination, PPD and immunizations. Current CPR certification or concurrent enrollment in a CPR class approved by the American Heart Association or American Red Cross including infant, child and adult. Completion of NURS 1100 and 1101, BIOL 2210K and PSYC 1101 with grades of “C” or better. Completion of or concurrent enrollment in BIOL 2211K. 3-6-5

NURS 1104. Career Mobility for LPNs to RNs. A 10- semester- hour course placed in the summer semester of the nursing sequence. There are eight hours of class and six hours of laboratory experience weekly. The course provides for advanced placement of the licensed practical nurse in the associate degree nursing program and builds upon the previous knowledge and skills obtained in the licensed practical nurse education. New concepts and skills will be introduced upon which sequential study will be developed. The concepts of Adaptation; Developmental Stages; Basic Needs Theory; Critical Thinking; Health-Illness Environment; Promotion, Maintenance, and Restoration of Health; and the Role Functions of the Associate Degree Nurse are introduced as the framework of the curriculum. Emphasis is placed on the use of critical thinking to meet the needs of clients in the practice of mental health nursing and medical-surgical nursing. Emphasis is placed on the students’ use of verbal communications with adult clients in both one-to-one and group settings. Clinical experiences will be with mental health clients in acute, residential and community agencies including day treatment centers and substance abuse centers. Other clinical experiences will

utilize campus labs, case studies and simulated learning experiences. Prerequisites: Completion of PSI background check and drug screening. Current health insurance and current physical examination, PPD and immunizations. Current CPR certification or concurrent enrollment in a CPR class approved by the American Heart Association or American Red Cross including infant, child and adult. Completion of all learning support requirements. Completion of BIOL 2210K, BIOL 2211K, and PSYC 1101 with grades of "C" or better. Completion of, with grades of "C" or better, or concurrent enrollment in BIOL 2215K and PSYC 2103. Completion of a minimum of 27 semester credit hours of required general education courses with grades of "C" or better. 8-6-10

NURS 2211. Care of Adults II. A ten-semester-hour course placed in the third or fourth semester of the nursing sequence. There are six hours of class and twelve hours of lab weekly. It is designed as a continuation of Care of Adults I and facilitates use of critical thinking when caring for clients who are experiencing interferences with the basic physiologic needs of nutrition, mobility, elimination, and sexuality. Technical skills are refined and new skills are learned in simulated and actual clinical experiences. Attention is given to specific maladaptive responses to stressors occurring in adult clients. Roles and responsibilities of the nurse in caring for clients with common recurring health problems will be explored and defined. Rehabilitative aspects of care expand to include provider and teacher roles. Students are expected to apply knowledge of developmental theory, anatomy and physiology, nursing concepts, and skills previously acquired in providing nursing care for the adult client. This course provides in-depth exploration of client responses to complex multi system disorders. Maslow's hierarchy is utilized to prioritize needs for clients in all stages of development throughout the life span. NURS 2211 utilizes various community resources to afford the nursing student opportunities for selected clinical laboratory and observation experiences. Experience as manager of care for small groups of clients is provided. Prerequisites: Completion of PSI background check and drug screening. Current health insurance and current physical examination, PPD and immunizations. Current CPR certification or concurrent enrollment in a CPR class approved by the American Heart Association or American Red Cross including infant, child and adult. Completion of NURS 1100, 1101, 1102, 1103 or 1104, BIOL 2210K, BIOL 2211K, BIOL 2215K, PSYC 1101, and PSYC 2103 with grades of "C" or better. 7-9-10

NURS 2213. Women's Health. A six-semester-hour course placed in the third or fourth semester of the nursing sequence. There are four hours of class and six hours of clinical laboratory each week. This course focuses on the study of issues related to women's health. Women's health will be examined from conception through menopause with particular emphasis being placed on the woman and her family during the childbearing period. Nursing 2213 is designed to assist the student in utilizing critical thinking to provide care for women through all phases of their lives and for the newborn during the first month of life. The family-centered approach emphasizes care of the family as well as identification of those stressors which interfere with adaptation to normal pregnancy, childbirth, and the neonatal period as well as other time periods in a woman's life. Health and wellness for women will be presented so that the student can begin to incorporate assessment as well as teaching strategies to assist women in maintaining optimal health. Gynecologic issues for women will be identified and nursing care for women and their families experiencing crisis will be discussed. Students are expected to apply knowledge of developmental theory, anatomy and physiology and nursing concepts and skills previously acquired in providing nursing care in the hospital and selected community settings. Prerequisites: Completion of PSI background check and drug screening. Current health insurance and current physical examination, PPD and immunizations. Current CPR certification or concurrent enrollment in a CPR class approved by the American Heart Association or American Red Cross including infant, child and adult. Completion of NURS 1100,

II01, I102, 1103 or NURS I104; BIOL 2210K and BIOL 2211K, BIOL 2215K; PSYC 1101 and PSYC 2103 with grades of “C” or better. 4-6-6

NURS 2214. Nursing of Children. A six-semester-hour course placed in the third or fourth semester of the nursing sequence. There are four hours of class and six hours of clinical laboratory weekly. Emphasis is on a family-centered approach to the nursing care of children. Consideration is given to the well child and to the child who has special adaptation needs due to the stress of illness. Use of critical thinking to provide care for children from infancy through adolescence who are operating on the first four levels of Maslow's Hierarchy will be explored. Students utilize previously acquired nursing principles and skills as well as knowledge of growth and development and anatomy and physiology in providing care in the hospital and selected community settings. Age appropriate oral and written communication techniques will be utilized in interpersonal, small group, and one-to-one presentations. Prerequisites: Completion of PSI background check and drug screening. Current health insurance and current physical examination, PPD and immunizations. Current CPR certification or concurrent enrollment in a CPR class approved by the American Heart Association or American Red Cross including infant, child and adult. Completion of NURS I100, II01, I102, 1103 or NURS I104; BIOL 2210K, BIOL 2211K, BIOL 2215K, PSYC 1101, and PSYC 2103 with grades of “C” or better. 4-6-6

NURS 2215. Management and Health Care Issues. A one-semester-hour course placed in the second year of the nursing sequence. This course may be taken concurrently with any second level nursing course. It is designed to bridge the gap between theory and practice and to increase the relevance of nursing leadership and management. Transition from the role of student nurse to graduate nurse is emphasized by explaining how theory translates into behaviors appropriate to contemporary nursing care management. Conflict resolution, interpersonal relationships, and oral and written communication skills are emphasized as tools for leadership and management. The use of computer searches on the world wide web provides the student with a broad base of knowledge. This course serves to differentiate traditional leadership and management perspectives and to relate them in an integrated way with contemporary nursing trends and practice applications. Prerequisites: Completion of PSI background check and drug screening. Current health insurance and current physical examination, PPD and immunizations. Current CPR certification or concurrent enrollment in a CPR class approved by the American Heart Association or American Red Cross including infant, child and adult. Completion of BIOL 2210K, BIOL 2211K, BIOL 2215K, PSYC 1101, and PSYC 2103 with grades of “C” or better. I-0-I

Nursing 3104. RN to BSN Career Mobility. This course will build upon previous knowledge and skills obtained at the associate degree level. This course will focus on nursing theory, changing demographics of our population, healthcare financing, expanding care outside the hospital and other new issues in an evolving healthcare system and is the foundation for socialization from an ASN graduate to a Baccalaureate prepared RN. Prerequisites: Current RN Licensure in Georgia. Completion of PSI background check and drug screening. Current health insurance and current physical examination, PPD and immunizations. Current CPR certification or concurrent enrollment in a CPR class approved by the American Heart Association or American Red Cross including infant, child and adult. 3-0-3

Nursing 3105. Nursing Pathophysiology. The influence of mechanisms upon structure and function of the body's adaptive and compensatory mechanisms will be explored. The interaction of life-style, culture, gender differences, and intrinsic and extrinsic environmental

factors will be examined. Emphasis is placed upon the pathophysiological concepts for understanding the rationale for prevention of disease and promotion of health and wellness through therapeutic nursing interventions and therapeutic nursing interventions. Prerequisite is completion of Anatomy and Physiology I and II with the grade of 'C' or better. 3-0-3

Nursing 3106. Health Assessment. This course will build on assessment skills acquired in the ASN and practice setting. Current skill levels will be enhanced through didactic instruction for clients across the life span. The interview process will be explored, emphasizing the health history. A cultural approach will be included. The clinical hours will allow the practice of new assessment techniques and offer opportunities to develop interview skills. 2-2-3

Nursing 4107. Nursing Research. This course is designed to introduce nursing research techniques and will explore practical application of research to delivery evidence-based practice. This course will enable the student to think critically about research and formulate questions of inquiry. Methods and strategies related to quantitative and qualitative research are investigated. A major focus is on increasing the ability to analyze, criticize, and interpret research and its application to clinical practice. Prerequisite: Completion of MATH 2280 with a grade of "C" or better. 3-0-3

Nursing 4108. Nursing Leadership and Management. This course will examine current trends in nursing leadership and management in order to improve care delivery in a cost-effective manner. Organizational leadership styles and quality indicators will be examined to improve patient outcomes. Students will utilize core measures as quality indicators and explore reimbursement as an indicator of performance-based funding. 4-4-6

Nursing 4109. Community Health. This course emphasizes concepts of healthcare delivery to individuals, families, and groups found in the community. Disease prevention, health promotion, and health restoration are themes that will be explored. Certain global topics will be included. An overview of the philosophy of community health services delivery. The emphasis is on prevention of illness and promotion of health of individuals, families, communities, and related socio-cultural and environmental factors. Healthcare policy and financial aspects associated with care delivery will be examined at the local, state and national level. 4-4-6

Nursing 4110. Informatics. This course provides an introduction to healthcare informatics and electronic medical records. In this course, general computer office applications and healthcare specific information technology applications are presented and used. The major product for this course will focus on information systems as related to healthcare safety, quality improvement, resource utilization, and data management to improve patient outcome. Ethical and legal issues impacting the use of technology in healthcare are explored. 3-0-3

Nursing 4111. Ethics in Nursing. This course will explore current models for ethical decision-making. Selected ethical dilemmas in nursing practice will be analyzed. There will be an emphasis on the self- evaluation of personal and professional values. 3-0-3

PHILOSOPHY (PHIL)

PHIL 2010. Introduction to Philosophy. This course engages students in opportunities for analysis and critical thinking as they examine a variety of positions and arguments that are central in the history of philosophy. Course topics include, but are not limited to, time, the existence of God or gods, free will personal identity, the nature of morality and knowledge. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

PHIL 3150. Professional Ethics. This course will enable the students to engage in critical thinking and analysis as they examine difficult moral problems that may arise in a variety of professional settings. Readings and discussion will focus on issues of personal decision-making, and public policy in the context of their social, political, economic and legal parameters. Prerequisite: Junior standing or permission of the instructor. Passing or exempting ENGL 0989 3-0-3

PHYSICAL EDUCATION (PHED)

PHED 1000. Fitness for Life. A lecture-laboratory course designed to provide the student with physiological, psychological, and sociological evidence of why humans should exercise. Each student develops and implements an individualized fitness program. 1-2-2

PHED 1001. First Aid. A basic first aid course which covers care given to a person who has been injured or suddenly taken ill. 2-0-2

PHED 1002. CPR (Cardio Pulmonary Resuscitation). An American Heart Association curriculum dealing with respiratory and cardiac emergencies. Completion of this course certifies one as a Healthcare Provider (nurses) or a Heart Saver Provider (lay people). \$5.00 lab fee. 1-1-1

PHED 1003. CPR Recertification Test for Health Care Professionals. Students are expected to show up for the recertification ready for both a written and skills test in health care CPR. Prerequisites: Proof of previous American Heart Health Care Provider certification. \$5.00 lab fee. 1-1-1

PHED 1004, First Aid/CPR. This required course combines instruction in first aid and CPR to provide the student with the basics of care given to a person who has been injured or suddenly taken ill or who has suffered a respiratory or cardiac emergency. 2-0-2

PHED 1100. Personal Fitness I. Emphasizes an individualized fitness program which includes aerobic, flexibility, strength, and cardiovascular endurance activities. 0-2-1

PHED 1101. Personal Fitness II. Course II will allow a student to continue the personalized fitness program for an additional semester. 0-2-1

PHED 1102. Weight Training. Emphasizes weight lifting, circuit training, and cardiovascular endurance. 0-2-1

PHED 1104. Fitness Walking/Aerobics. A course designed to increase fitness, reduce stress, and improve health through the use of aerobics and graded walking techniques. 0-2-1

PHED 1120. Baseball/Softball Techniques and Strategy. Practical experience in fundamental skills and techniques, team play & strategy. 0-2-1

PHED 1200. Tennis/Golf. Emphasizes fundamental skills of tennis and golf. 0-2-1

PHED 1201. Tennis/Badminton. Emphasizes fundamental skills of tennis and badminton. 0-2-1

PHED 1202. Bowling. Emphasizes fundamental skills of bowling. \$40.00 lab fee. 0-2-1

PHED 1210. Badminton. An introduction to badminton stressing the basic skills, rules and strategies of play needed to participate in the sport successfully. 0-2-1.

PHED 1230. Golf. Designed primarily for beginners; emphasis on teaching the basics of the game of golf. Instruction focuses on the grip, stance, and the basic swing pattern. There may be an additional golf fee. 0-2-1.

PHED 1240. Racquetball. A course designed to provide instruction in the rules, strategies, and basic skills necessary to play the sport of racquetball. 0-2-1.

PHED 1250. Beginning Tennis. An introduction to tennis stressing the rules, court etiquette, skill development and the language of the sport. 0-2-1.

PHED 1280. Introduction to Yoga. This course promotes the connection of breath and movement through a dynamic flow of asanas, building strength and flexibility. Classes will generally begin with sun salutations and progress through standing and balancing postures, forward folding, lateral opening, twists, backbends, and inversions. This physical practice helps us to go within ourselves and create a deep, peaceful awareness of body and mind. By learning and practicing physically challenging flow sequences, your body will begin to rid itself of physical and mental blocks that dwell within. The result is improved circulation, a light and strong body, and a calm mind. This course will also promote the use of yoga for relaxation and meditation. 0- 2-1.

PHED 1300. Softball/Volleyball. Emphasizes fundamental skills and team concepts of softball and volleyball. 0-2-1

PHED 1301. Volleyball/Basketball. Emphasizes fundamental skills and team concepts of volleyball and basketball. 0-2-1

PHED 1400. Firearm Safety. An introduction to the rules of safety and operation of the B.B. gun, rifle and hand gun. Successful completion of the course certifies students in Hunter Safety. 0-2-1

PHED 1410. Canoeing. An introduction to basic solo and tandem navigational and canoeing fundamentals. Prerequisite: basic swimming ability, comfortable in deep water, self-rescue skills. 0-2-1.

PHED 1500. Beginning Swimming. For non-swimmers or swimmers who can swim less than 40 yards. 0-2-1

PHED 1501. Swimming. For swimmers who can swim 40 yards or more. 0-2-1

PHED 1502. Life guarding. Students must pass the American Red Cross entrance requirement of swimming 500 yards to enroll in class. 1-2-2

PHED 1600. Dance/Aerobics. Emphasizes the improvement of cardiovascular efficiency and muscle tone through aerobics and dance. 0-2-1

PHYSICAL SCIENCE (PHYS)

PHSC 1011. Foundations of Physical Science. A survey of basic principles underlying physical phenomena. Topics studied include motion, energy, work, wave phenomena, and modern science. Prerequisite: MATH 1001 or 1111, passing or exempting ENGL 0989. 3-0-3

PHSC 1011L. Laboratory for Foundations of Physical Science. A laboratory course to augment and support PHSC 1011. Prerequisite: Passing or exempting ENGL 0989. Prerequisite or Corequisite: PHSC 1011. 0-2-1

PHYS 1111K. Introductory Physics I. An introductory course which will include mechanics (kinematics, dynamics, work and energy, momentum and collisions, and rotational motion and statics), and may also include thermodynamics and waves. Elementary algebra and trigonometry will be used. Prerequisites: MATH 1113 and passing or exempting ENGL 0989. 3-2-4

PHYS 1112K. Introductory Physics II. An introductory course which will include electrostatics, electric current and circuits, and electromagnetism, and may also include optics and modern physics. Elementary algebra and trigonometry will be used. Prerequisite: PHYS 1111K. 3-2-4

PHYS 2211K. Principles of Physics. An introductory course which will include mechanics (kinematics, dynamics, work and energy, momentum and collisions, and rotational motion and statics), and may also include thermodynamics and waves. Elementary calculus will be used. Prerequisite or Corequisite: MATH 2253. Prerequisite: Passing or exempting ENGL 0989. 3-2-4

PHYS 2212K. Principles of Physics II. An introductory course which will include electrostatics, electric current and circuits, and electromagnetism, and may also include optics and modern physics. Elementary calculus will be used. Prerequisite: PHYS 2211K. Prerequisite or Corequisite: MATH 2254. 3-2-4

POLITICAL SCIENCE (POLS)

POLS 1100. American and Georgia History and Constitution. This course is designed to provide students with the essential knowledge of American Constitution/History and Georgia Constitution/History in order to meet the Georgia legislative requirements. 1-0-1

POLS 1101. American Government. Designed to give the student a general knowledge of the structure and functions of the government of the United States and Georgia with some time devoted to the study of current events and problems. Successful completion of this course satisfies the Georgia legislative requirements for proficiency in United States and Georgia government. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

POLS 2100. Introduction to the European Union. This course introduces the student to the historical origins and development of the European Union, the EU's governing institutions, the EU's policymaking processes, current EU policies and issues, and EU-US relations. The course also constitutes the core offering of the European Union Studies Certificate program. Prerequisite: Passing or exempting ENGL 0989. (See HIST 2100.) 3-0-3

POLS 2200. Studies of the European Union. The purpose of the course is to provide an in-depth analysis on a selected aspect of the study of European Union (EU). The course is intended as an Area E. elective for students interested in taking a course in the Online or Study Abroad catalogs of the University System's European Union Center for which the only prerequisite is POLS 1101. Prerequisite: ENGL 0989, prior approval of the instructor and successful completion of POLS 1101. (See HIST 2200) 3-0-3

POLS 2401. Global Issues. Examines how and why states act as they do in their contemporary relations. Continuing factors such as power, war, ideology, and governmental organizations, and recently emerging influence including supranational organizations, multinational corporations and natural resource allocation are examined. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

PSYCHOLOGY (PSYC)

PSYC 1101. Introduction to General Psychology. A broad survey of the major topics in psychology including, but not limited to, research methodology, biological and social factors influencing behavior, development, learning, memory, personality, and abnormal. Prerequisite: Passing or exempting ENGL 0989. 3-0-3.

PSYC 2101. Introduction to the Psychology of Adjustment. An introductory examination of the applied psychological theory and research concerning mental health and well-being. Prerequisite: Passing or exempting ENGL 0989. 3-0-3.

PSYC 2103. Introduction to Human Development. An introductory, non-laboratory based examination of human development across the lifespan with an emphasis on normal patterns of physical, cognitive, and social development. Prerequisite: PSYC 1101. 3-0-3.

PSYC 2201. Abnormal Psychology. An introduction to the concept of abnormal psychology. The course will provide an overview of definitions of abnormality, issues of diagnosis and treatment, including a general introduction to the DSM-IV, theories of abnormal behavior and preventative issues, with a focus on community psychology. Prerequisite: Passing or exempting ENGL 0989. 3-0-3.

PSYC 3101. Human Behavior in Organizations. This course deals with human behavior in organizations. Conceptual frameworks, case discussions, and skill-oriented activities are applied to course topics which include: motivation, learning and development, group dynamics, leadership, communication, power and influence, change, diversity, organizational design, and culture. Class sessions and assignments are intended to help participants acquire skills and analytic concepts to improve organizational relationships and effectiveness. 3-0-3.

PSYC 3200. Leadership Development. The course is designed to improve personal awareness in the areas of self-management, professionalism, work attitudes and motivation, personality, innovation and creativity, communication, diversity, and ethical

decision making. In addition, students will gain an appreciation and understanding of the diverse individual differences that leaders encounter in a global workforce. Students can apply concepts from this class to their own professional development and also use concepts to promote and sustain a diverse working environment. Upon completion of this course, students will recognize their strengths and weaknesses and create a professional development plan that emphasizes self-management practices. 3-0-3.

PSYC 3201. Industrial/Organizational Psychology. This course focuses on both research and the application of research findings to practical problems in the workplace. Topics include the recruitment, selection, training, motivation and job performance of individuals at work. 3-0-3.

PSYC 3301. Developing and Managing Teams. The ability of a group to function as a team to run things, to make things, or to provide recommendations about things is a powerful organizational dynamic. This course addresses teaming as a leadership tool to be used in appropriate situations to maximize individual talent through collective interactions. Students will learn what makes a group a team, how to build and lead a team, and how to facilitate team performance. Structured exercises and assessments carried out both in and outside of the classroom will provide students with teaming experiences that develop their team consultation and facilitation skills. The most recent body of research literature will be used to develop a realistic understanding of what teaming can and cannot do as a leadership tool. 3-0-3.

RECREATION (RECR)

RECR 2201. Introduction to Recreation Services. This course is designed to introduce students to the concepts and principles of leisure and recreation. Opportunity is offered for each student to observe the recreation services of a number of agencies in operation. 3-0-3

RECR 2202. Social Recreation. Social recreation is designed to offer students the materials, information, and experience necessary to adequately conduct social recreation programs. 2-2-3

RECR 2203. Outdoor Recreation. Presents an overview of the scope of outdoor recreation. The history and development of outdoor recreation, conservation, and organized camping is presented. 2-2-3

RECR 2204. Recreation Leadership. This course is designed to give students experience and knowledge of leadership principles and procedures in recreation. 2-2-3

SCIENCE (SCIE)

SCIE 1111. Environmental Science-Energy, Air, and Water Resources. An interdisciplinary course that uses scientific principles to examine environmental issues. The inter-relatedness between humans and nature as well as the earth's limited resources will be studied. Specific topics include human population, traditional energy sources, alternative energy sources, air pollution, formation of the ozone hole, global warming, and water pollution. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

SCIE 1111L. Laboratory for Environmental Science–Energy, Air, and Water Resources. A laboratory course to augment and support SCIE 1111. Prerequisite or Corequisite: SCIE 1111. 0-2-1

SCIE 1121. Environmental Science—Earth and Biological Resources. An interdisciplinary course covering environmental issues relating to Earth's terrestrial and aquatic ecosystems, weather, agricultural issues, waste and waste management and geology. The environmental science courses SCIE 1111 and SCIE 1121 are totally independent. You may take SCIE 1121 without taking SCIE 1111. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

SCIE 1121L. Laboratory for Environmental Science—Earth and Biological Resources. A laboratory course to augment and support SCIE 1121. Prerequisite or Corequisite: SCIE 1121. 0-2-1

SOCIOLOGY (SOCI)

SOCI 1101. Introductory Sociology. A study of the discipline of sociology. Topics will include sociological theory, methods and selected substantive areas. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

SOCI 1160. Introduction to Social Problems. A theoretical and empirical analysis of selected major problems confronting American society. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

SOCI 2293. Introduction to Marriage and the Family. An introduction to the structure, processes, problems, and adjustments of contemporary marriage and family life. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

SOCI 2501. The Multiple Aspects of Diversity. An introduction to the sociology of race and ethnic relations, examining selected racial and ethnic subcultures with respect to past and present history, past and present patterns of participation, minority-majority relations, maintenance patterns and consequences of prejudice and discrimination for American life. A multicultural perspective and an analysis of minority groups in American society will be included. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

SOCI 3501. Gender in Work. Students will examine the differences in the work experiences of men and women within organization. Topics include gender-role attitudes, occupational segregation, gender and leadership, sexual behavior in the workplace, career mobility and workforce diversity. 3-0-3.

SPANISH (SPAN)

SPAN 1001. Elementary Spanish I. Grammar, reading, writing, simple listening and speaking skills. Prerequisite: Passing or exempting ENGL 0989. 3-0-3

SPAN 1002. Elementary Spanish II. Continuation of SPAN 1001. Prerequisite: SPAN 1001 or equivalent. 3-0-3

SPAN 1101. Elementary Spanish Conversation and Culture I. Students will develop the cultural understandings, attitudes and performance skills needed to function appropriately within a society of the target language and to communicate with the culture bearer. Prerequisite or Corequisite: passing or exempting SPAN 1001, or instructor's permission. 0-2-1 (Institutional Credit.) (May not be used to satisfy core curriculum requirements.)

SPAN 1102. Elementary Spanish Conversation and Culture II. Students will develop the cultural understandings, attitudes and performance skills needed to function appropriately within a society of the target language and to communicate with the culture bearer. Prerequisite or Corequisite: Passing or exempting SPAN 1002, or instructor's permission. 0-2-1 (Institutional Credit.) (May not be used to satisfy core curriculum requirements.)

SPAN 2001. Intermediate Spanish I. A more advanced course which refines skills in grammar, reading, writing, and speaking with emphasis on imperatives, present subjunctive, and description and narration in simple tenses (past, present and future). Culture lessons focus on Spain, Mexico and Central America. Prerequisite: SPAN 1002 or permission of instructor. 3-0-3 Prerequisite: SPAN 1002 or equivalent. 3-0- 3

SPAN 2002. Intermediate Spanish II. Application and refinement of basic skills with emphasis on reading, writing, and speaking with emphasis on conditional, past subjunctive and compound tenses. Culture lessons focus on Spanish-speaking countries in South America and the Caribbean. Prerequisite: SPAN 2001 or equivalent. 3-0-3

SPAN 2101. Intermediate Spanish Conversation and Culture I. Students will develop the cultural understandings, attitudes and performance skills needed to function appropriately within a society of the target language and to communicate with the culture bearer. Prerequisite or Corequisite: passing or exempting SPAN 2001, or instructor's permission. 0-2-1 (Institutional Credit.) (May not be used to satisfy core curriculum requirements.)

SPAN 2102. Intermediate Spanish Conversation and Culture II. Students will develop the cultural understandings, attitudes and performance skills needed to function appropriately within a society of the target language and to communicate with the culture bearer. Prerequisite or Corequisite: passing or exempting SPAN 2002, or instructor's permission. 0-2-1 (Institutional Credit.) (May not be used to satisfy core curriculum requirements.)

COLLEGE ORIENTATION AND SUCCESS (SGSC)

SGSC 1000. South Georgia State College Orientation and Success. This course is designed to help students learn skills that will make them better college students, not only academically, but also socially. The course will focus on helping students identify strengths and offer services, resources and opportunities to build upon these strengths. Also, the course will provide specific knowledge, tips, skills and shortcuts for excelling in a student's academic and occupational endeavors. Topics covered in this course will be college issues, services available to students, tips for better communication with classmates and instructors, time management and study skills. No prerequisite. 1-0-1 (This course is required for all first-time, full-time students.)

STUDY ABROAD (SABR)

SABR 1000, 1001, 1002, 1003, 1004. Study Abroad. Organized academic study outside the United States. Study normally focuses on the culture, language, history, or economics of a nation or region. May be repeated for credit when topics vary. No prerequisite. 0-2-1 (Institutional credit)

SABR 2001-2005. Study Abroad. An interdisciplinary course of selected areas of history, political science, economics, arts, and literature. Awareness and understanding of cultural, ethnic, racial, and gender diversity will be addressed. [SABR 2001 – United Kingdom; 2002 – South Pacific & Asia; 2003 – European Union; 2004 – Africa; 2005 - Latin America]. 3-0-3.

THEATER (THEA)

THEA 1000, 1001, 1002, 1003. Theater Practicum. A lab course for students participating in a theater production as actors and/or technical crew. 0-2-1. (Institutional Credit.)

THEA 1100. Theater Appreciation. A study of the theater as a collaborative art form, from script to performance. Includes historical background, the roles of the various persons involved both on and off stage, and the importance of both the performance space and the audience. 3-0-3

THEA 2210. Voice and Diction. An introduction to vocal training for the production of Standard American Speech, with an emphasis on resonance, breath control, vocal relaxation, and posture using the International Phonetic Alphabet (IPA) and a variety of approaches to contemporary vocal training. Prerequisites: Passing or exempting ENGL 0989. 3-0-3

THEA 2800. Fundamentals of Acting. An introduction to the principles of acting, including proper preparation for acting, physical and vocal control and flexibility, and the analysis and creation of character. Instruction includes class lectures, exercises, and scene study. 3-0-3

Revised 1/8/18
