

Focus Area: STEM

Student Name _____

ID Number _____

The Science, Technology, Engineering and Mathematics (STEM) Focus Area is the perfect place for students interested in sciences, engineering, mathematics or computers. With a STEM degree, students can transfer to major universities to become medical doctors, pharmacists, marine biologists, petroleum engineers, computer programmers, and forensic scientists, to name just a few valuable professions. The goal of this focus area pathway is to encourage the development of a strong curricular foundation in STEM while allowing the student to explore areas of interest more deeply through a selection of focus classes. Academic advisement for this area is provided by the School of Sciences.

Focus area pathways enable students who are undecided in their future studies and/or career goals to start in a pathway relative to their interests that can lead to a viable degree program. Courses taken in the focus area pathways are designed to assist students in making choices best suited to their interests and skills. Thus, as students progress in focus area pathways, they should be able to transition into appropriate academic pathways designed for transfer or degree attainment.
