

The mission of Information and Instructional Technology is to provide South Georgia State College students, faculty, and staff with a reliable and secure technology infrastructure that supports the student learning process, academic programs, and the administrative service functions of the College.

In support of this mission, we will:

- To provide oversight of the College network and administrative systems, computer labs, and classroom and office technology
- To deliver training on the use of the technology and software programs.
- To demonstrate technical and operational excellence through a commitment to professionalism and continuous improvement.
