

BACHELOR OF SCIENCE: EDUCATION
ELEMENTARY/SPECIAL EDUCATION

The Bachelor of Science in Education program is designed to allow students to complete a dual major in early childhood and special education. The goal of the program is to elevate the knowledge and skills of individuals who already possess the A.S. in Education and who seek the knowledge and skills needed to be effective educators in both fields in grades P-5.

*ECSP 3100 requires a grade of "B" or higher (state requirement)

**All Courses in Areas A and F require a grade of "C" or higher

(see next page for important information)

In addition to the successful completion of the program of study and satisfactory performance in all field experiences (with a grade of "C" or higher), ELE/SPED students must also pursue the assessments required by the Georgia Professional Standards Commission for certification. To be considered a program completer and graduate, a student must meet the following requirements:

- *Attempt the Georgia Educator Ethics Exit Assessment, GACE Content Assessment, and edTPA;*
- *Submit the GaPSC and SGSC/UNG Computer Surveys;*
- *Earn a grade of "C" or higher in all major coursework; and*
- *Maintain an overall 3.0 GPA.*

To be eligible for teacher certification, candidates must receive passing scores on the Georgia Educator Ethics exit exam, the GACE content assessments for the degree field, and the edTPA portfolio.

BACHELOR OF SCIENCE: LONG-TERM HEALTHCARE MANAGEMENT

Students who earn this degree will develop educational skills and knowledge necessary for managers of long-term healthcare provided in patient residences and long-term care facilities. The program focuses on serving the aging, as well as individuals of any age who suffer from debilitating physical and mental disorders. The program curriculum and training experiences address a variety of healthcare concepts and practices, such as adult health, aging, and developmental disabilities across the lifespan, acute care, subacute care, chronic disease management, psychiatric issues, mental health, disease management, health promotion, and health restoration. The program also focuses on leadership, organizational structure, human resources management strategies, operations management, finance, health law, marketing, communication, and decision-making. Additionally, students gain an increased understanding and knowledge of quality healthcare systems relating to quality assurance, risk management, managed care, insurance, ethics, and other information and practices important to managing in a demanding healthcare environment. Graduates of this program will have the skill to coordinate care among interdisciplinary health care professionals, community agencies, and long-term care facilities, all of which will increase quality of life and improve long-term outcomes.

BACHELOR OF SCIENCE: MANAGEMENT (Organizational Behavior Option)

The Bachelor of Science in Management program is designed to allow students to complete one of three options, each consisting of 30 credits of upper-level coursework. The options are intended to link coursework with work experiences in the areas of Management and either Organizational Behavior, Marketing, or Financial Technology (FinTech). The goal of the program is to elevate the knowledge and skills of individuals who already possess an A.S. in Business and who seek the knowledge and skills needed to be effective leaders, business owners, work in the Financial Technology industry, or who seek career advancement. Students who have not completed the Area F requirement may take up to 12 hours of these courses concurrently as program electives.

BACHELOR OF SCIENCE: Mechanical Engineering Technology

Bachelor of Science in Mechanical Engineering Technology (MET) graduates can work in many industries, and their work varies by industry and function. MET graduates will be able to apply the knowledge and skills they have learned in a number of local industries in the region. Job placement opportunities will exist in industries that rely on mechanical engineering consultations, product and materials testing, drafting and computer graphics and manufacturing and quality management.
